### Freight

#### Water Resistant Slack Adjuster – KRD-482-R

NYAB's automatic, double-acting slack adjusters for freight car applications require no servicing between overhauls. Designed for body mounted applications, our KRD-482-R slack adjuster is also available in the Water Resistant version.

#### Key Additional WR Features

- **Drain holes on both ends** allow condensation to escape.
- **Zinc-nickel plating on tension rod** improves corrosion resistance.
- **Improved seals on both ends of slack adjuster** help prevent contamination.
- **Tension rod support** prevents seal wear and prolongs service life.
- **Additional O-rings** help to prevent water ingress.
- **Nitrile sealing rings with an integral wasp excluder** prevent foreign debris from entering through the drain hole.
- **Optimal design** for crude oil tank car service
- **Group "R" compliant**

#### Engineered to Outperform (E<sub>2</sub>O) quality, superior service, competitive prices

NYAB's products deliver durability and reduce costs. For more information on product benefits, visit [www.nyab.com](http://www.nyab.com) or contact Vince Moore, Product Line Manager, at **315-786-5271**.
