LOC-PAD™

NYAB's LOC-PAD glad hand is engineered to achieve a significant reduction in undesired hose separations. Featuring uniquely placed and raised metal pads that gently 'lock' your hose connection - without undue compression of gaskets - LOC-PAD glad hands reduce lost productivity and wasted fuel caused by unintended hose separations.

Key Additional LOC-PAD Features

- **Greatly reduces undesired hose separations**, since only an intentional 10 degree rotation of the glad hands enables the disconnect.
- **Metal-to-metal interface** prevents unexpected separations.
- **LOC-PAD glad hands couple and uncouple with the same force** as standard glad hands.
- **Compatible with all AAR-approved glad hands.**
- **Features NYAB's HiFlo lipguard**, is offered with wide-lip gaskets, and is compatible with both wide-lip and standard gaskets.

Engineered to Outperform (E₂O) quality, superior service, competitive prices

NYAB's products deliver durability and reduce costs. For more information on product benefits, visit www.nyab.com or contact Vince Moore, Product Line Manager, at **315-786-5271**.
