

# Technical Guide for the Product User

## 1-1/4" SINGLE PIECE REPAIR CARTRIDGE FOR ANGLE COCK

### PRODUCT DESCRIPTION

Cartridge Based Angle Cock (CBAC) allows for ease of repair as all internal parts can be replaced quickly without removing the angle cock from the car piping.

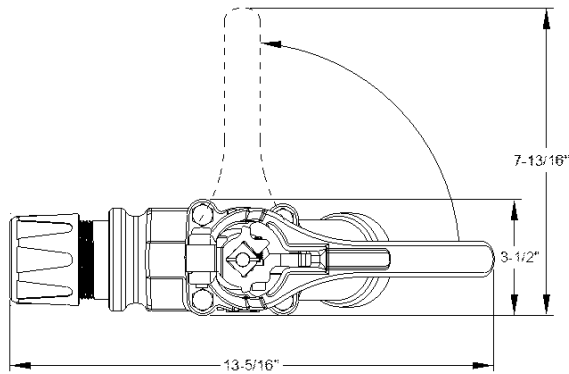

### FEATURES

- One Piece Composite Ball and Key which provides:
  - Corrosion free, non-abrasive, positive sealing surface
  - Reduced time and cost to perform rebuilding due to fewer parts
  - Lighter weight
- Captivated hex head cap screws allow for ease of assembly by eliminating lost screws during installation.
- Ease of maintenance as all internal repairable parts can be replaced without removing the angle cock from the car piping.
- Gripseal end connection provides a leak free seal at temperatures ranging from -50°F to 200°F in addition to the internal standard 1-1/4" pipe thread connection for maximum protection against pull-off.
- Approximate net weight of 3-3/8 lbs
